Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) Responsive to communication(s) filed on 25 August 2004.
 2a) This action is FINAL. 2b) This action is non-final.
 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Response to Amendment

1. The proposed reply filed on August 25, 2004 has been entered.

Claim Objections

2. Claim 24 is objected to because of the following informalities: Claim 24 should be depended on claim 1 or other rather on canceled claim 11. Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) The invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

4. Claims 1-3, 5-8, 21, 22, and 24 are rejected under 35 U.S.C. 102(a) as being anticipated by Applicant Admitted Prior Art (AAPA)

Regarding claims 1, 6-8, 21, 22, and 24, Fig. 1 of AAPA discloses a method of manufacturing an electronic-charge-transferring device comprising: providing a charged species source (10) emitting charged species; and providing a charged species drain (60) receiving the charged species and electrically connected to a device (70); and positioning a movable component (30), having a size of a micrometer scale or smaller (the thickness of component 30 is about the thickness of 2 electrons) and being operable to transfer the charge; species to the

charged species drain, in close proximity to the charged species source (Fig. 1); positioning a first protrusion (40) having a size of a micrometer scale or smaller (the thickness of protrusion 40 is about the thickness of 13 electrons) proximate to a first surface (inner surface) of the moveable component; positioning the charged species source proximate a second surface (outer surface) of the moveable component, such that the movable component is between the first protrusion and the charged species source; positioning a second protrusion (50) having a size of a micrometer scale or smaller (the thickness of protrusion 50 is about the thickness of 13 electrons) proximate to the first surface the moveable component; and positioning the charged species drain proximate the second surface of the moveable component, such that the movable component is between the second protrusion and the charged species drain.

Regarding claims 2-3, Fig. 1 shows a charged species source and drain having a size of a micrometer scale or smaller (the size of source and drain are about the thickness of 10 electrons).

Regarding claims 5-6, see page 2 of Applicant's specification.

Allowable Subject Matter

5. Claims 4 and 23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

6. Applicant's arguments with respect to claims 1-3 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Donghai D. Nguyen whose telephone number is (703) 305-7859. The examiner can normally be reached on Monday-Friday (9:00-6:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter D. VO can be reached on (703) 308-1789. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
